

Getting Started with Documentation -as-a-Service (DaaS)

Welcome to the SymbioStreamsDaaS platform We help you build Intelligence-First Documentation that serves both your human users and their AI agents

Quick Start Guide

1. Initial Assessment

Schedule a 15-minute consultation with our orchestrator to define your documentation scope.

Goal: Identify key APIs, SDKs, and "Tribal Knowledge" silos

Output: A custom DaaS Roadmap.

2. Connect Your Data

We integrate directly with your codebase and existing docs.

Source Sync: Provide read access to your GitHub/GitLab repositories

Manual Ingestion: Upload existing PDF manuals or internal wiki exports

3. Structure for AI

Our engine transforms your raw data into an LLM-Optimized Knowledge Base.

llms.txt Generation: We create a specialized index for AI scrapers and agents

Structured JSON-LD: We embed machine-readable metadata into every page for high RAG accuracy

4. Deploy & Automate

Launch your professional documentation site on a custom domain

Mintlify Integration: Sleek, modern design out of the box.

Auto-Update: Every PR or API change triggers an automatic documentation refresh

Key Features

Semantic Search: Powered by our vectorized intelligence index

Agent Sandbox: A testing environment where you can benchmark how AI agents interact with your docs.

Multi-Format Support: Markdown, HTML, PDF, and Executable Logic-Maps.

Pricing

Hobby: \$0 - Basic Mintlify setup for open-source projects

Pro: \$250/mo - Auto-updating LLM-optimized and custom branding

Enterprise: Custom - Includes SemanticBridge (legacy digitization) and dedicated support
